About Us

We may be a new name in Pakistan's energy sector, but the mind behind the machine is of veterans with over 30 years of experience. It was built from observation, from years inside an industry that had grown comfortable with repetition. The same claims. The same promises. The same expectations. We saw a category where inconsistency was normalized and innovation was abandoned. Where reliability was marketed more often than it was engineered. That complacency became our starting point.

Alaska was established with a clear conviction: **Standards must rise, Reliability must be maintained and Performance must be proven.**

We set out to deliver greater value without compromise. We test beyond the minimum standards, because that is how the real world is. We listen, we refine, and we improve. Alaska exists to solve everyday power problems, so you can drive, work, and live with confidence. Our story is not about entering the energy space, it is about redefining what it should expect.

Vision

To resolve the needs of our people and improve their lives. By using innovation, to bring opportunities to the masses. Enable people, businesses & communities to keep moving forward with confidence.

Mission

To use state-of-the-art technologies in delivering innovative energy solutions and set new standards for the energy sector and become a trusted name in every house hold.

Core Values

Quality Without Compromise

Integrity Always

Better Everyday

Innovation With Purpose

Official Sponsor

Alaska Batteries is proud to serve as the Official Presenting Sponsor of Pakistan Hockey under a landmark agreement with the Pakistan Hockey Federation (PHF).

This strategic partnership goes beyond conventional branding; it is a long-term investment in the revival, modernisation, and commercial sustainability of Pakistan's national sport.

As the exclusive Energy Partner, Alaska Batteries secures premium visibility across all PHF national teams including the U-21 and U-18 squads, coaching clinics, talent hunt programs, and official broadcast/digital platforms. This sponsorship also facilitates high-impact engagement through player and coach appearances at dealer meetings, product launches, and corporate campaigns.

Crucially, this sponsorship includes a first right to negotiate for future Title Sponsorship of Pakistan Hockey, underscoring Alaska Batteries' commitment to building a lasting legacy, both on the field and in the boardroom.

Global Presence

Alaska Batteries is actively expanding its international footprint across the Middle East, Africa, and Central Asia. This marks the beginning of a focused global growth strategy backed by our 10+ acre manufacturing facility, 5 GWhr annual production capacity, and a 2,000+ strong workforce.

Our export approach is built on long-term partnerships, not one-time transactions. We work closely with distributors, importers and strategic business partners to build sustainable, mutually beneficial relationships in every market we enter.

We also offer Private Label / OEM manufacturing, enabling partners to launch batteries under their own brand with mutually agreed specifications, minimum order quantities, packaging requirements and commercial terms.

With a proven production base, established quality systems and a growing international exposure, Alaska Batteries is positioned as a reliable, scalable and long-term manufacturing partner for global markets.

Product Range

- Automotive Batteries
- Deep Cycle & Solar Batteries
- Maintenance Free Batteries
- Inverters

All batteries are designed with powerful CCA ratings, faster recharge, more life cycle and durable construction to handle extreme climate conditions.

Technologies

Graphite Lead-Acid Battery

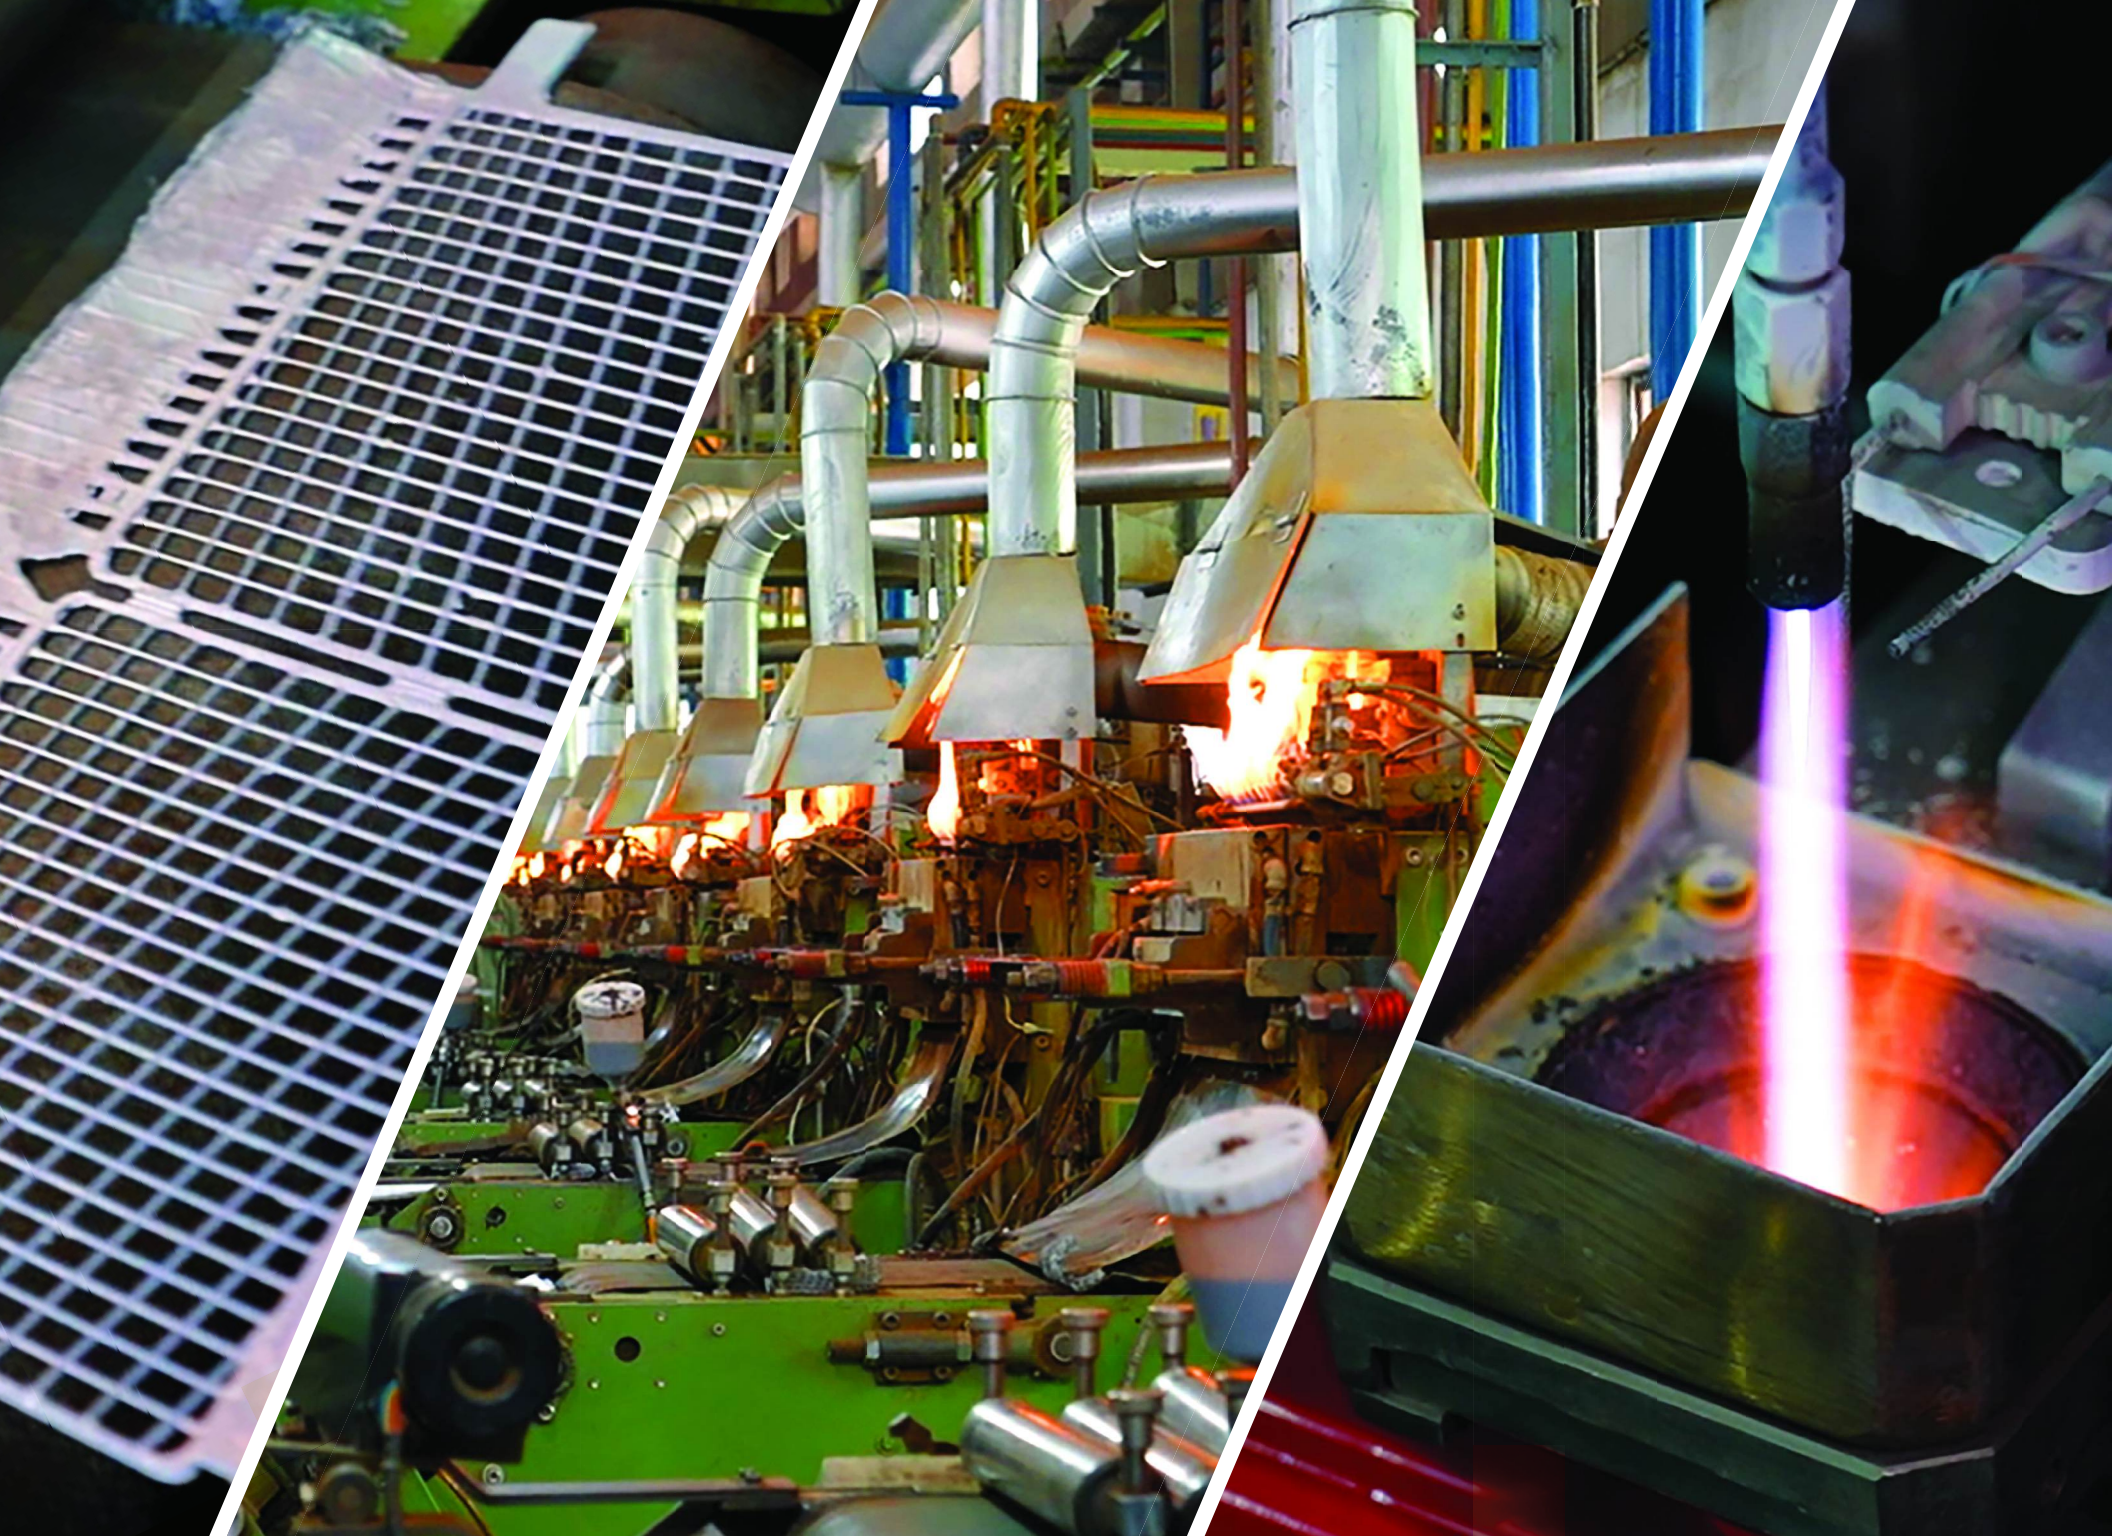

- Advanced Plate Composition
- Deep Discharge Recovery
- Energy Efficiency & Heat Resistance
- Fast Charge Acceptance
- Ideal for Modern Applications

DeepCycle Battery

- Thicker Plates
- Longer Backup
- Built for Frequent Usage
- Deep Discharge Capability
- Ideal for Solar Systems

Calcium Silver

- Start-Stop Compatibility
- High Temperature Endurance
- Under-Hood Durability
- Grid Corrosion Resistance
- Ideal for Vehicles

Alaska Inverters

ہر لمحہ اعتماد

Hybrid Solar Inverters

Dual Output | Grid Feeding (optional)

High Reliability

Enhanced safety with Built-in Transformer Isolation, provides added protection for users.

Built-in Powerful Optimizer effectively drives heavy home loads, ensuring reliable performance for demanding appliances.

More Convenient

Maximum Charging Current, Faster Charging.

High Compatibility

More surge-power has better protection function for special application scenarios such as refrigerator, air conditioner and water pump.

Wider range, more power generation.

Cost-Effective

Additional energy for battery charging at 100% capacity.

Ensures maximum energy conversion and enhances overall system performance.
